

#### **LAB ASSIGNMENT #1**

#### 1) UML Class diagram for the below scenario:

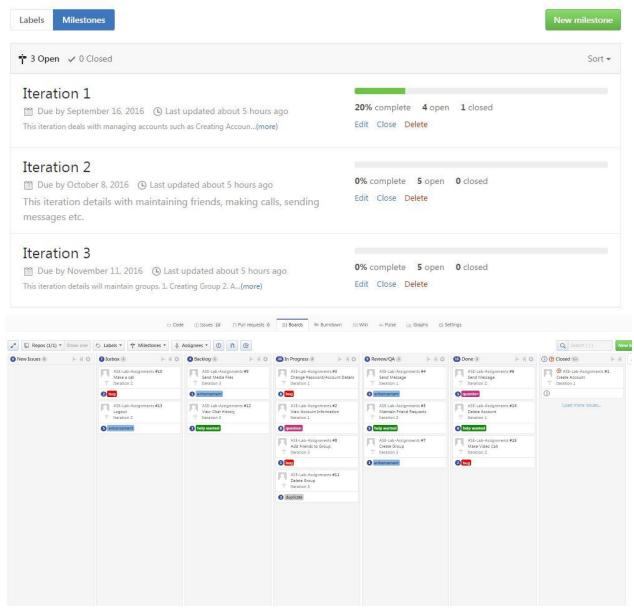

*Chat application:* A user can create an account and add friends using their mobile number or email id. User can chat with any individual from his friends list; User can also create groups and invite his friends to join the group. In addition to that, media like images, video, location can be shared with friends and group.

# 2) Using ZenHub tool create a board, 3 iterations, at least 5 tasks and show the analytics graph.

- Under ASE-Lab-Assignments repository 3 milestones are created as Iteration 1, Iteration 2 and Iteration 3.
- Each Milestone is created with Start Date and End Date.
- Under each Milestone 5 tasks are created.
- Each task is assigned to its respective pipelines such as New Issue, Icebox, Backlog, In-Progress, Review, Done and Closed.
- Also each task is given a Story Point i.e. an estimate which is used measure the effort required to implement tasks.

Student Id: 16234180 Class Id: 8 Page 3 of 7

• For each milestone burndown chart is generated which represents the work that is left verses time based on number of issues and its Story Points.

### Iteration 2

This iteration details with maintaining friends, making calls, sending messages etc.

† Iteration 2		
Repository	Issues	Story Points
ASE-Lab-Assignments	① #13 Logout	6
ASE-Lab-Assignments	① #6 Send Message	5
ASE-Lab-Assignments	① #5 Maintain Friend Requests	5
ASE-Lab-Assignments	① #15 Make Video Call	2
ASE-Lab-Assignments	① #10 Make a call	9

★ Edit Milestone

#### Iteration 3

This iteration details will maintain groups.

- 1. Creating Group
- 2. Adding friends to Group
- 3. Deleting Group
- 4. Sending media files to group

#### 3) Creating Wiki page through Github

https://github.com/cmoulika009/ASE-Lab-Assignments/wiki/ASE-Lab-Assignment-1

### ASE Lab Assignment 1

Moulika Chadalavada edited this page 2 minutes ago · 11 revisions

#### LAB ASSIGNMENT 1

- Lab Assignment #1 mainly concentrates on usage of tools like GitHub, ZenHub, Creately, Visio etc.
- New repository ASE-Lab-Assignments is created in GitHub and this repository is cloned from remote to local machine.
- Class Diagram is created for Chat Application Process using Creately.
- Using both GitHub and Zenhub Board, 3 Milestones with 5 tasks each are created
- · Burndown graphs are generated for each Milestone.
- Under ASE-Lab-Assignments repository two folders Source and Documentation are created in local and the class diagrams and chats are place under Documentation folder.
- Again from local machine the changes are cloned to remote GitHub.
- All the above details are documented in below link.

Lab #1 Documentation

## 4) Create GitHub Account. Create a repository in remote Github. Clone it to local machine.

- New repository ASE-Lab-Assignments is created in remote Github and is cloned to local machine.
- Two folders Source and Documentation is created and the Lab-1 Assignment documentation is placed in Documentation folder.
- All these changes done in local machine is cloned to remote GitHub.
